About Me

Fourth-year Software Engineering undergraduate at the University of Kelaniya with hands-on experience in full-stack web development and modern web technologies. Passionate about building scalable, user-focused applications and continuously expanding my knowledge in backend systems, blockchain technologies, and AI-driven solutions. A proactive team player who adapts quickly and thrives in collaborative environments.

Education

B.Sc. (Hons.) Software Engineering *Jul 2023 – Present*
University of Kelaniya, Sri Lanka
Current GPA: 3.51/4.00
Domains: Advanced Web Applications, Mobile Computing Applications, Data Science & Engineering Applications

GCE A/L (Physical Science Stream) *2019 – 2022*
Sri Sumangala College, Wariyapola
Z-Score: 1.61 Combined Maths: B Physics: A Chemistry: B

Internship Experience

Software Engineering Intern — ByteSquad Labs *Sep 2025 – Mar 2026*
Duration: 6 months — Tech Stack: Next.js, React.js, Node.js, Express.js, MongoDB, Webpack
Contributed to production-grade web applications and Chrome extensions involving blockchain analytics, AI integrations, and secure crypto-payment workflows in an agile environment.

Olney Labs (Token Analytics Platform): Built token analytics features using Solana APIs, including token evaluation tools, wallet portfolio insights, and crypto news aggregation with scalable API integration.

AI Chatbot & X402 Payment Integration: Implemented crypto-focused AI workflows using OpenAI APIs and integrated Coinbase's X402 protocol with secure transaction validation before enabling premium chatbot features.

Focus/Time - Tracking Web Application: Implemented task duration tracking and UI improvements to refine user workflows and strengthen usability and state handling.

Engineering Practices: Worked in Jira-based sprints, contributed to debugging and refactoring, improved UI implementations from Figma, and optimized modules for maintainability and scalability.

Chrome Extensions Developed and Enhanced:

- **AnchorGPT** – Added pinned responses and color-coded organization for improved ChatGPT usability.
- **Tech Copilot** – Built extension UI, backend integration, and streaming AI responses with improved OCR handling.
- **Tabily** – Implemented auto backup/restore, task management, star ratings, and refactored architecture.
- **Instagram Automation Extension** – Built automated follower list processing and username extraction workflows.

Projects

Web Development

Kochi Guru Pizza - Pizza Shop Web App (Client Project, Ongoing)
Next.js, Express, MongoDB
Developing a real-world pizza shop web application for a client using Next.js and Express.js. Implemented user authentication with JWT-based session handling, protected user profile endpoints. Currently working on menu management, cart functionality, order processing, and admin dashboard features tailored towards business requirements.
GitHub: kochi-guru-pizza Live Demo

BrewHub - Coffee Shop Web App (Individual, 2025)
MERN, Tailwind CSS
Developed a full-stack coffee shop platform with a responsive React and Tailwind CSS frontend and an Express-MongoDB backend, enabling users to browse the menu, manage carts, place orders, and access features securely.
GitHub: BrewHub Vercel: Live Demo

FuelWise.lk - Fuel Quota Management System (Group, 2024)
Spring Boot, React, Flutter, MySQL
Built a multi-role fuel quota management platform using Spring Boot, React, and Flutter, enabling real-time quota tracking, station-wise fuel updates, and efficient fuel distribution for users, stations, and administrators.
GitHub: FuelWiseLK

FindYourMechanic - Mechanic Booking Platform (Group, 2024)
HTML, CSS, JS, PHP, MySQL
Built a multi-role vehicle breakdown assistance platform where customers can find and book nearby mechanics, mechanics manage appointments, and admins oversee users and services.
GitHub : findyourmechanic.lk

Mobile App Development

TaskMaster - Task Management App (Individual, 2025)
React Native CLI, AsyncStorage
Built a lightweight To-Do-List application with centralized state management using Zustand and persistent storage via AsyncStorage. Supports task creation, completion tracking, and deletion with a clean and intuitive user interface.
GitHub: TaskMaster

HabitBuddy - Habit Tracking Mobile App (Individual, 2025)
React Native CLI, AsyncStorage
Built a habit tracking mobile application with authentication, tab-based navigation, and habit management features. Enables users to create, edit, and track daily habits with progress monitoring and persistent local storage for seamless data retention across sessions.
GitHub: HabitBuddy

UI/UX Design

BookHub - Library Management System UI Design (Group, 2024)
Figma
Designed an interactive and user-friendly UI prototype for a modern library management system, focusing on intuitive navigation, clean dashboard layouts, and efficient book borrowing workflows.

Technical Skills

Programming: HTML, CSS, JavaScript, TypeScript, Java, PHP, Dart
Frameworks and Libraries: Next.js, React, React Native, Node.js, Express.js, SpringBoot, Flutter
Databases: MySQL, MongoDB
Tools: Git/GitHub, Postman, Jira, Figma, VS Code, IntelliJ, Android Studio, Power BI

Certifications

- Java Object-Oriented Programming – LinkedIn Learning
- GitHub Foundation – GitHub
- Flutter & Dart for Beginners – Udemy

Highlights

- Top 10 Team – JuniorHack 2024 (Software Engineering Students' Association, University of Kelaniya)
- 1st Runner Up – Inter-Faculty Mathematics Competition 2024 (University of Kelaniya)

Volunteering

- Public Visibility Lead – IEEE Student Branch , University of Kelaniya *Aug 2025 - Present*
- Head of Design – IEEE Student Branch , University of Kelaniya *Aug 2024 - Aug 2025*
